OBJECTIVE

Python Full Stack Web Developer with strong expertise in Python, Flask, and Django, and solid knowledge of modern web technologies. Experienced in building end-to-end full-stack applications with secure authentication, RESTful API integration, database design and management, and MVC/MVT architecture. Passionate about backend development, scalable system design, and cloud-based application deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java

Web: HTML, CSS, JavaScript, React.js, Bootstrap

Backend: Flask, Django, Node.js

Databases: SQLite, MySQL, PL/SQL, MongoDB, PostgreSQL

ORM & Tools: SQLAlchemy, Django ORM, Git, VS Code, Cloudinary, WhiteNoise, Render

Soft Skills: Problem Solving, Management, Communication, Critical Thinking, Networking

INTERNSHIP

Software Developer Intern | Cravita Technologies India Private Limited

- Worked on real-time live projects using Python, Flask, MongoDB, HTML, CSS, and JavaScript. Implemented CRUD operations, REST APIs, and followed MVC architecture.
- Evaluated key features using JSON Server and rendered the filtering option, to create 4+ web pages.
- Reviewed code with 2 developers with over 5+ features to develop user-facing experiences.

Software Development Engineer (Intern) | Vibaas Technology

- Enhanced a web-based student Login system using HTML, CSS, and JavaScript.
- Applied JavaScript form validation and real-time user feedback to ensure accurate data entry, improving scheduling efficiency by 30% and reducing no-show rates by 25%.
- Integrated frontend logic with a PL/SQL-backed database, ensuring reliable data storage and retrieval.

TECHNICAL PROJECTS

Barkat Imperial Elegance | *Django, PostgreSQL, HTML, CSS, Bootstrap, JavaScript, Cloudinary, WhiteNoise*

- Developed a full-stack e-commerce web application for traditional sarees with product browsing, cart, wishlist, user reviews, and session-based authentication.
- Integrated Cloudinary for persistent media storage, resolving Render's ephemeral file system limitations; optimized DB queries using Django ORM and handled static files via WhiteNoise.

Attendance Management System | *Django, DRF, SQLite, OpenCV, NumPy, Pillow, SciPy, Bootstrap, JavaScript*

- Built a Django MVT web app for digitizing classroom attendance with role-based access (Student, Teacher, Admin), recurring class scheduling, and daily auto-rotating 6-character class keys.
- Developed an OpenCV-based face verification pipeline using Haar cascades and Euclidean distance comparison for optional live attendance authentication with configurable tolerance thresholds.
- Implemented anti-proxy controls: time-window-bound attendance, duplicate prevention via unique DB constraints, teacher verification gates, and full audit trails via action logging.
- Exposed REST API endpoints for attendance marking and class key verification using DRF with CSRF protection, role-based route guards, and POST-only state transitions.

Personal Developer Portfolio |

React 18, Vite 5, JavaScript (ES6+), GSAP + ScrollTrigger, Three.js, React Three Fiber, React Icons, Formspree

- Built a responsive multi-page portfolio web app showcasing profile, education, skills, publications, and live/source-code projects with a dedicated freelancing project page.
- Implemented immersive 3D interactions including tilt, hover, and flip cards using Three.js and React Three Fiber, paired with GSAP-powered intro and scroll animations via ScrollTrigger.
- Integrated contact workflows across Formspree form, email, WhatsApp, LinkedIn, and GitHub, with color-coded CTA buttons (Live/Source) for streamlined project navigation.
- Focused on accessibility with keyboard support and reduced-motion handling, delivering production-ready UI polish across all device sizes.
