OBJECTIVE

Python Full Stack Web Developer with strong expertise in Python, Flask, and Django, and solid knowledge of modern web technologies. Experienced in building end-to-end full-stack applications with secure authentication, RESTful API integration, database design and management, and MVC/MVT architecture. Passionate about backend development, scalable system design, and cloud-based application deployment.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java

Web Technologies: HTML, CSS, JavaScript, React.js, Bootstrap

Backend Frameworks: Flask, Django, Node.js

Databases: SQLite, MySQL, PL/SQL, MongoDB, PostgreSQL

ORM Tools & Others: SQLAlchemy, Django ORM, Git, VS Code, Cloudinary, WhiteNoise, Render

Soft Skills: Problem Solving, Management, Communication Skills, Critical Thinking, Networking

INTERNSHIP

Software Developer Intern

Cravita Technologies India Private Limited

- Worked on real-time live projects using Python, Flask, MongoDB, HTML, CSS, and JavaScript. Implemented CRUD operations, REST APIs, and followed MVC architecture.
- Evaluated key features using JSON Server and rendered the filtering option, to create 4+ web pages.
- Reviewed code with 2 developers with over 5+ features to develop user-facing experiences.

Software Development Engineer (Intern)

Vibaas Technology

- Enhanced a web-based student Login system using HTML, CSS, and JavaScript.
- Applied JavaScript form validation and real-time user feedback to ensure accurate data entry and enhance user experience, improving scheduling efficiency by 30% and reducing no-show rates by 25%.
- Integrated frontend logic with a PL/SQL-backed database, ensuring reliable data storage and retrieval.

TECHNICAL PROJECTS

Barkat Imperial Elegance | *Django, PostgreSQL, HTML, CSS, Bootstrap, JavaScript, Cloudinary, WhiteNoise*

- Developed a full-stack e-commerce web application for traditional sarees with features including product browsing, cart, wishlist, user reviews, and session-based authentication.
- Integrated Cloudinary for persistent media storage, resolving Render's ephemeral file system limitations; optimized database queries using Django ORM and handled static files via WhiteNoise.
- **Links:** [Live Site](#)

Attendance Management System | *Django, DRF, SQLite, OpenCV, NumPy, Pillow, SciPy, Bootstrap, JavaScript*

- Built a Django MVT web application for digitizing classroom attendance with role-based access (Student, Teacher, Admin), recurring class scheduling, and daily auto-rotating 6-character class keys.
- Developed an OpenCV-based face verification pipeline using Haar cascades and Euclidean distance comparison for optional live attendance authentication with configurable tolerance thresholds.
- Implemented anti-proxy controls including time-window-bound attendance, duplicate prevention via unique DB constraints, teacher verification gates, and full audit trails via action logging.
- Exposed REST API endpoints for attendance marking and class key verification using Django REST Framework with CSRF protection, role-based route guards, and POST-only state transitions.
- **Links:** [Live Site](#)

Movie Recommendation System | *Flask, Python, SQLite, HTML, CSS, JavaScript, API*

- Built a full-stack Movie Recommendation System using Flask, featuring secure user authentication, preference management, and wishlist functionality.
- Integrated the TMDB API to provide personalized movie recommendations based on genre and language preferences.
- Designed a dynamic recommendation engine following MVC architecture, utilizing SQLite, SQLAlchemy ORM, and Jinja2 templates.
